BEYOND THE WORKSPACE

PRODUCT CATALOG

UPLIFTED IDENTITY

Having reached the 40th anniversary of the company, 2019 is a very special year for the **mobica** team. This notable forty-year mark demonstrates our strong commitment to the industry – both in Egypt and globally. As a celebration and as a response to our growing portfolio, we have uplifted our brand to better reflect our ability to adapt to change and to clarify the diverse industry segments we have penetrated.

Our logo has transitioned to feature lower case letters, reflecting our promise to always remain approachable no matter how many anniversaries are celebrated. The final dot at the end of our logo is to reiterate that we are here and we are here to stay. A strong graphical element using primary shapes and familiar colors has been infused into the identity in order to communicate a simple message of relatability. The newly shape- and color-coded divisions are titled WORK, LIVE, LEARN, HEAL, and MOVE – categorizing all of our interior offerings into the common stages of the cycle of human life.

With pride, we reflect back on the work done throughout these last forty years, and hope to transfer all the drive and determination that have fueled it, to our newly uplifted **mobica** community.

We are pleased to be presenting you with our 2019 **WORK** collection.

Our workspace solutions have been classified under the WORK division, and represented by a progressive green square. The 4 corners of the square highlight our promise to adapt to your business **culture**; encourage the well-being of **employees**; lead to better productivity for your **enterprise**; and ultimately attain satisfied **customers**.

mobica.
work

Educational furniture is categorized under the LEARN division, and indicated by a youthful yellow triangle. Throughout history, structural engineers choose triangles to build the largest and toughest structures, meaning that this shape also best represents the strongest foundation anyone can possess – education.

mobica.
learn

Hospital and clinic furniture fit under the HEAL division, and are characterized by a calm blue hexagon. This shape is one of the most frequently discovered shapes in nature, and is both geometric and organic, therefore accurately represents the delicate balance between biology and technology in the healthcare industry.

mobica.
heal

Residential and hospitality solutions belong to the LIVE division, and are symbolized by an inviting red pentagon. This shape is visibly reflective of a structure that provides you with shelter, protects you, and make you feel secure - values that we hope are evident throughout this division.

mobica.
live

Automobile seating is branded under the MOVE division, and is symbolized by an active purple circle. This shape is standard in the automotive industry and provides speed, fuel efficiency, and the greatest rider comfort through four irreplaceable circular wheels.

HOW WE WORK

First, we guide you through the process of **defining your vision** by analyzing your wants and needs in order to create the most effective solution that meets all your requirements through kickoff meetings, showroom visits, and a budget analysis.

Next, we will brainstorm concept creation and deliver a 2D interior **design proposal** that includes zoning, furniture selection, materials/finishing, and project mood boards. This will be followed by a **financial proposal** with your selected products in the necessary quantities.

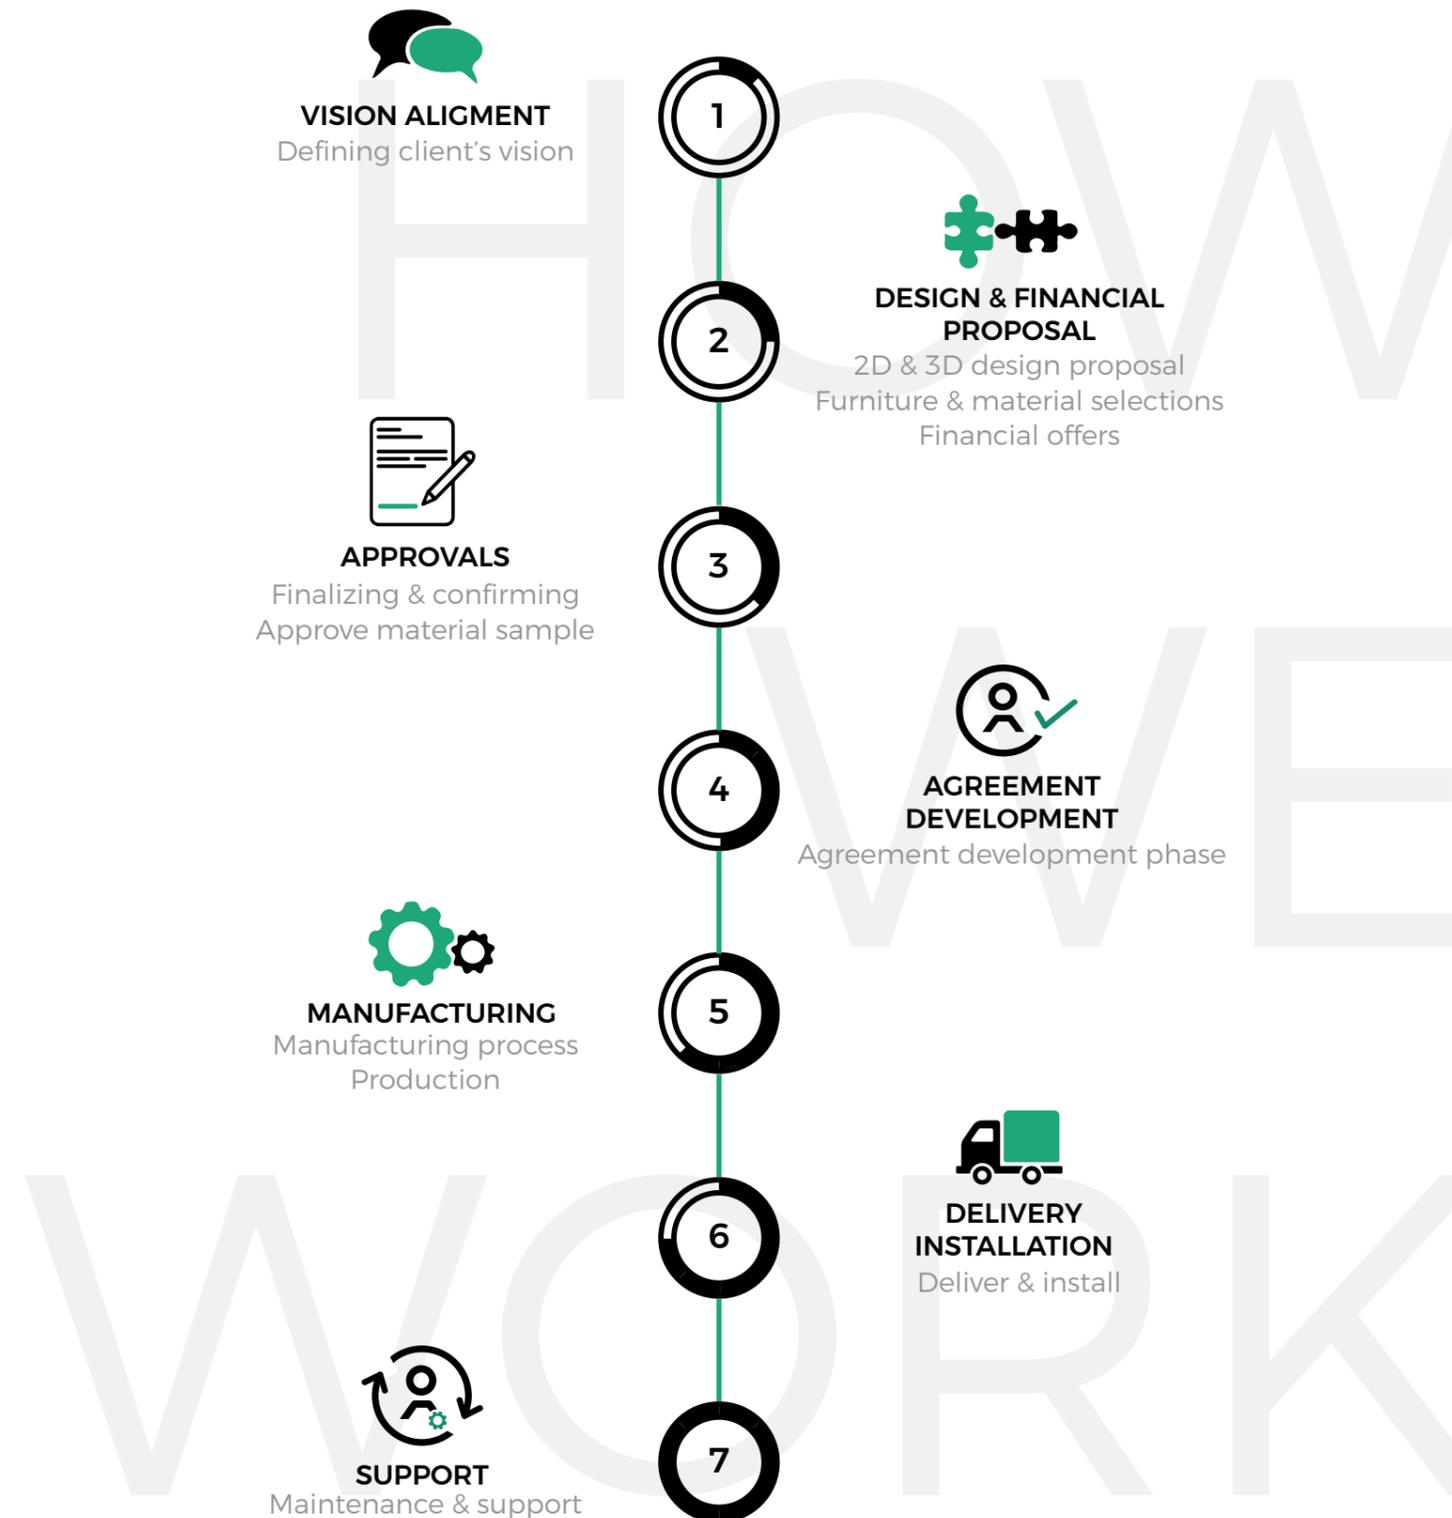

In order to finalize and confirm your order, you will pass through the **approvals** phase where we will approve in writing all changes made since the initial proposal, and you will be able to approve material samples.

Once you have had all your questions answered replace with and your inquiries clarified, we will move into the **agreement development** phase where we finalize delivery and installation schedules, and settle financial terms.

After down payments have been received, an order with your unique customer number will be sent to our factories in order to begin our highly efficient **manufacturing** process in our 280,000 m² space capable of producing up to a capacity of 87,000 units/month across all of our divisions.

Lastly, we will **deliver** your order and send our talented team of technicians to assemble and **install** on-site. We will ensure that your vision is executed flawlessly because we can only close with customer-signed satisfaction.

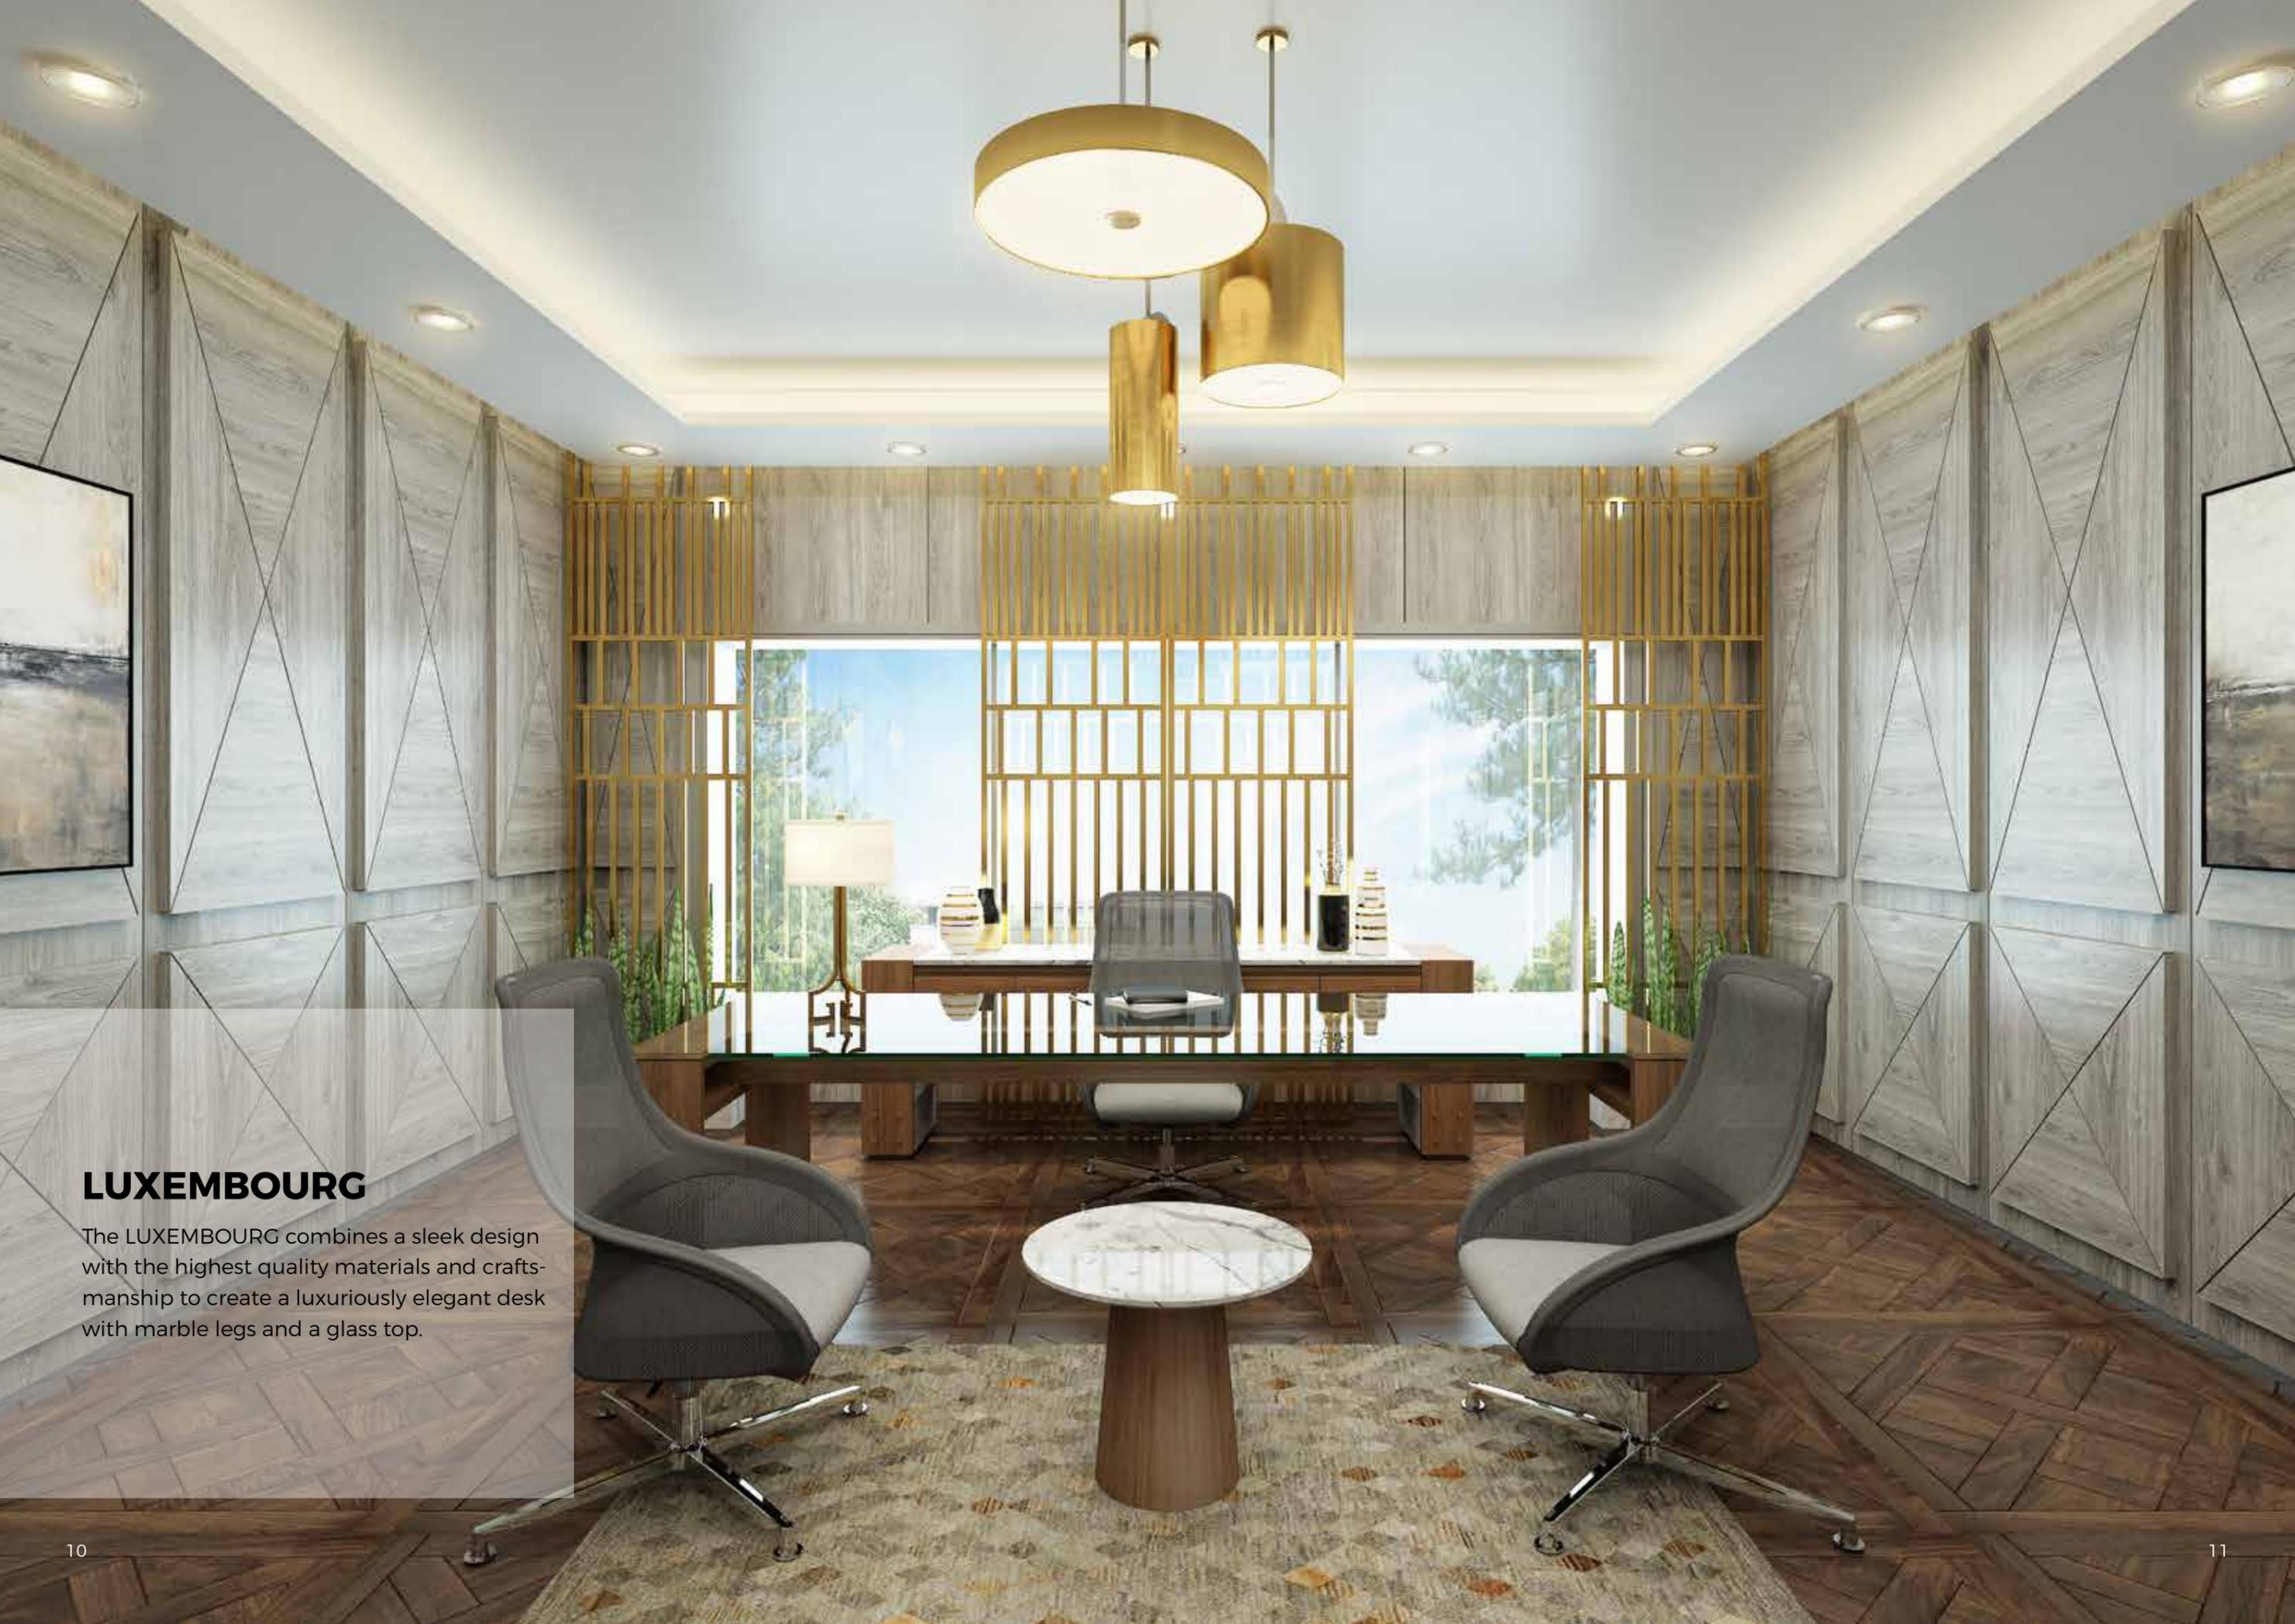

Our teams are always available to you, even after delivery. **mobica** takes pride in offering **maintenance and support** whenever it is requested.

SYNAPSO , KEKO, CANGO

WORKSTATION, SEPARATOR, PORTABLE DRAWER

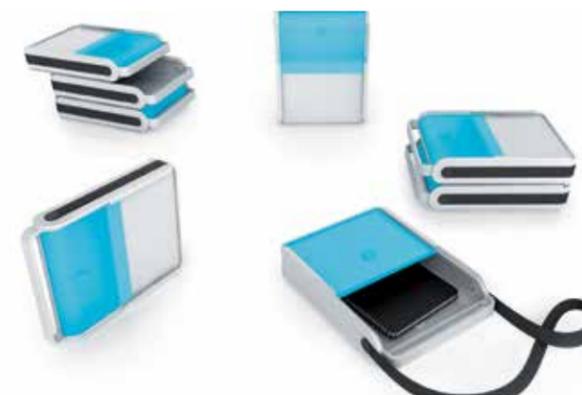

We have created functional furniture that is versatile and multifunctional, thus eliminating the need for specialized items for different functions. When the same furniture can be used for various functions through the office, it greatly simplifies the interior design and purchase processes and allows for greater harmony across the workspace.

KEKO is dual-purpose: It is used to divide work surfaces and also serves as a modesty panel under any desk as its adhesion system works in every position.

KEKO can be used with any surface and is easily relocated without the need for special preparations. Available in 3 versions: Felt, 3D structured fabric, and translucent PC.

A brand new concept in mobile storage which is a cross-over between traditional drawers and shoulder bags.

Can be used with any desk system and satisfies storage needs at the office and on the go.

BIRD

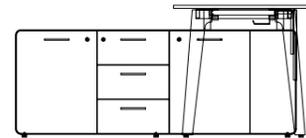

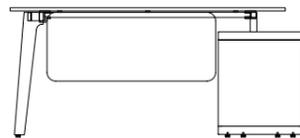

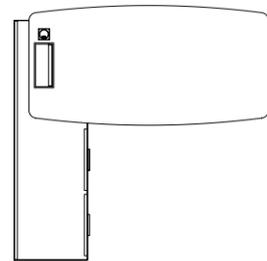

Focusing on the instinctive bond between human beings and organic materials, the wood legs on BIRD offers a natural appeal and a more comforting aesthetic for the workspace. The option of generously rounded edges is now available for the table tops as well.

ACCESSORIES SEPARATORS

Our separators come in various materials and finishings, and are installed on desks in order to improve the acoustic quality of your environment and also to separate particular working areas from each other.

The world's most flexible power outlet system

This innovative and award-winning track-based system allows you to add, remove, and reposition power outlets anytime/anywhere-with just a twist. Also available is an all-in-one solution that combines the power track technology with a cable management system and an elegant design, offering two-sided access to power.

LEO LIGHTING SYSTEM

LEO is a flexible and modular LED lighting system. The premium minimalist design features extruded aluminum, junctions of metal sheets and LED light strips. This system simplifies creating long, slim, and aesthetically seamless lines of light.

The LEO modules can be combined in various linear patterns and geometric shapes creating an impressive ceiling statement that is also highly practical.

The LEO system is easy to install and ensures a high level of reliability.

LEO can be integrated with our acoustic MUTE collection to create a product with a striking linear design that hovers from above to define zones without obstruction.

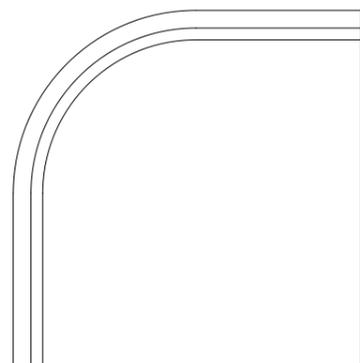

LEO can be integrated with MUTE to create a suspended design that features an impressive LED strip of light whilst also offering acoustic control.

The distinctive deep buttoned back, scroll arms and individually hand-tacked studding are the key features of the CHESTERFIELD family, available in 1, 2, 3 seaters and in a modernized L-shape.

The traditional Chesterfield style is interpreted with a modern twist in terms of size, comfort, and material combinations. Available in all-leather, or in our new modular system (as seen on the left) with a mixture of velvet and leather, the CHESTERFIELD is guaranteed to be a statement piece in any office or home.

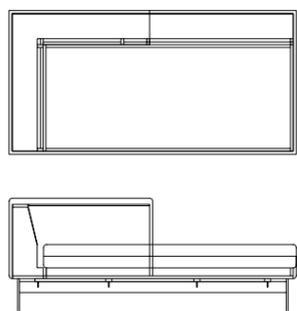

This system can also be elongated with coordinated wooden legs that correspond with the deep buttoned style.

BLADE
LOUNGE

The essential design of this clean-cut frame was the inspiration behind the BLADE name. This sofa seems to hover casually above the floor due to the interesting design of the structure. Contrasting the solid frame is the softness of the internal profile, emphasizing the comfort of the sofa due to the breadth of the seat.

THINK..

Outside
The Box.

THINK POD

THINK POD creates a room within a room. Made of 3 materials: glass, acoustic felt, and aluminum frames - this 'pod' is your go-to for when you need to isolate yourself from your busy surroundings and get things done.

FLAMINGO STOOL

The focus for the FLAMINGO design was to use as few components as possible and giving them a highly distinctive design. The aim was to create a chair that is simple in design, yet by no means anonymous in terms of personality. FLAMINGO will attract attention in any setting.

DOLPHIN STOOL

Notable for being both tough and light, DOLPHIN's clean symmetrical design is both comfortable and stable.

SWAN STOOL

SWAN blends functionality and elegance. Its organically shaped one-piece seat shell, and clean lines make SWAN an elegant chair, while the wood legs help to add a warm and approachable feel to many public spaces.

KENTRA CHAIR

The KENTRA chair boasts simplicity with its solid color options, and boasts functionality with its stacking side spacers.

REGUS

SIGNO CHAIRS

The SIGNO office chair is unique in that the shape of the chair follows your back and vice versa due to the double S-curve of the spine. This easily adjustable seat is ergonomic, features elegant seams and refined aluminum components making it an excellent choice.

CONTE TWO CHAIRS

With a mesh backrest, optional lumbar support, and a chromed design arch – CONTE TWO boasts an excellent comfort-design ratio. Hydraulic height adjustment and a tilting mesh back are incorporated as standard features of the chair.

LORDO CHAIRS

Reflecting a modern aesthetic, LORDO features an elastic mesh fabric mounted on a height adjustable backrest which pivots at the lumbar region.

LORDO waiting chairs are available with a swivel tilt mechanism, on a stackable sled base or with a four-post frame.

BLOSS CHAIRS

BLOSS is an elegantly minimalist ergonomic office chair, completely in translucent mesh, featuring automatic back tension adjustment and a horizontally adjustable seat, with optional clip-on fabric or leather covers for the seat and backrest. The well thought-out mesh concept ensures optimal support of the user's body while seated. All frame elements are recessed to avoid any discomfort for the user as his/her body is only supported by the mesh.

BLOSS works with a specially developed mechanism that is regulated automatically by the user's weight. No spring pressure regulation is required. The seat inclination adjustment is limited by a special mechanism.

OASIS
CHAIRS

The combination of materials in OASIS is innovative: the curved steel-tube is covered by knitted fabric and creates a distinctive icon. The area of the lumbar support and the headrest is covered by double fabric and thus offers the user an ergonomic sitting position with optimal comfort.

The OASIS product-family consists of 4 variations: executive, manager, task, and high stool. The chairs can also be mounted together on a table element and form a bench. In addition to that there is also a 360° degrees rotating writing-pad available.

SHARKO CHAIRS

SHARKO is an all-purpose chair that can be used wherever groups are working together: seminars, workshops, conferences and meetings. A mobile, comfortable and creative concept of a chair as a miniature workplace, complete with a work surface and storage space.

BOND CHAIRS

BOND is an elegant, lightweight, stackable waiting/seminar chair comprised of an injection-molded aluminum frame and translucent mesh seat and back, which can be horizontally connected in rows and is optionally equipped with armrests and a writing pad.

BRADO CHAIRS

BRADO is a high-performance chair that will do its job reliably and is fully equipped with ergonomic features for maximum comfort. It features a harmoniously coordinated multi-functional mechanism, adjustable lumbar support and armrests, and tilting mesh back.

AGIX CHAIRS

The AGIX is a unique task seating option for workplace environments. This multi-featured chair integrates an aluminum base, a sliding seat, lumbar support, adjustable armrests, and a head-rest option.

SPANISH CHAIRS

The SPANISH is a high-performance chair with a sturdy and ergonomic build. Its contemporary look makes it a natural choice for modern offices and personal workspaces. Overall, it is the perfect match for any desk-bound task and is an advanced performance task chair.

Adjustable lumbar support will accommodate your height and body type so that you are sitting ergonomically and at your most comfortable.

LOGIC CHAIRS

LOGIC is an operative seating solution characterized by great design and comfort, for modern and high-performance offices. The peculiarity of this chair is in its backrest with a chromed insert. The mesh, which wraps around the backrest, and the lumbar support ensure comfort and pleasure.

PRATIC CHAIRS

The shaped profile of the backrest makes the PRATIC office chair dynamic and appealing. The chair is available with or without a headrest, with a mesh backrest and a padded seat.

BOCK CHAIRS

For healthy and dynamic work environments, BOCK is a high-performance task chair that minimizes fatigue and potential physiological disturbances caused by prolonged working periods. Adjust BOCK to your body using the hydraulic height adjustment, tilting mesh back, adjustable head-rest, height adjustable arm-rest, and adjustable fully upholstered seat.

FLOW
CHAIRS

FLOW features a unique seating option with high-tech, elastic mesh backrest that smoothly adapts to your movements. It features a contoured polyamide frame and integrated armrest with the seat in breathable mesh fabric. Continuous organic form unites backrest with the seat.

REGUS
CHAIRS

The REGUS is a performance chair that is both comfortable and versatile. Contemporary and minimalistic, it is a proven choice for all work areas; from executive offices to home offices and front desks.

Top connection

STAR PARTITION SYSTEM

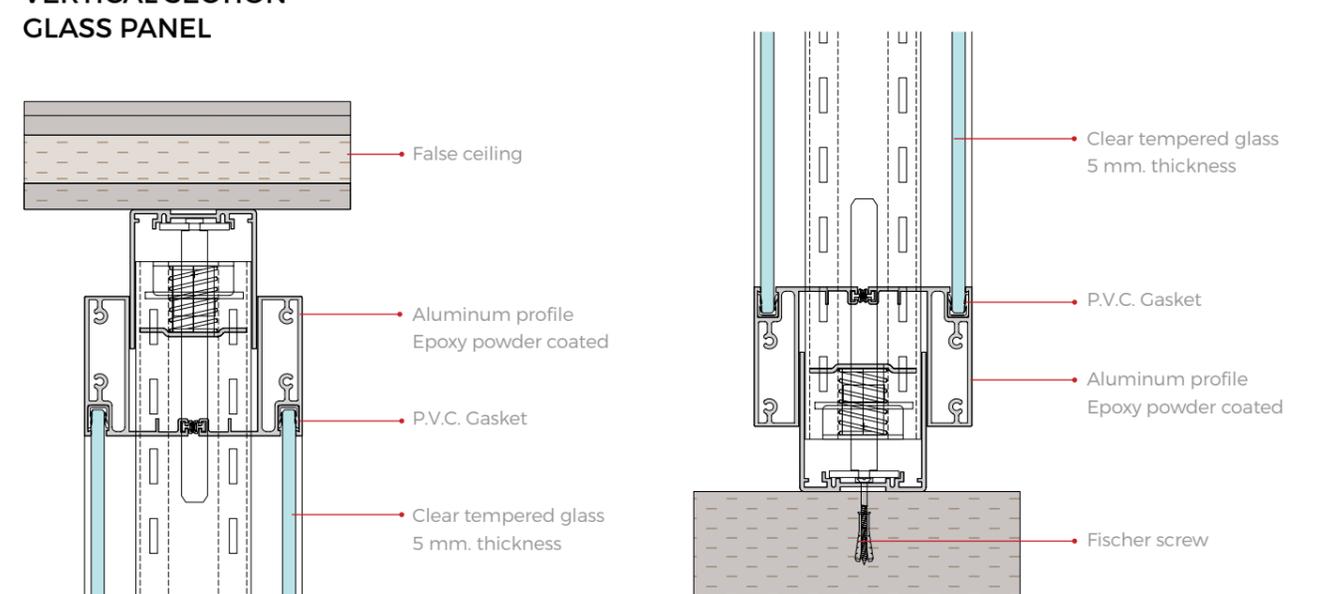

STAR creates not only visual privacy but sound privacy as well, given its exceptionally high acoustic performance. These features are a response to an increasing demand for privacy in open office spaces, where all areas are exposed and transparent. Finally, this system is most beneficial because it offers fast and simple installation with flexible design options.

VERTICAL SECTION WOOD PANEL

VERTICAL SECTION GLASS PANEL

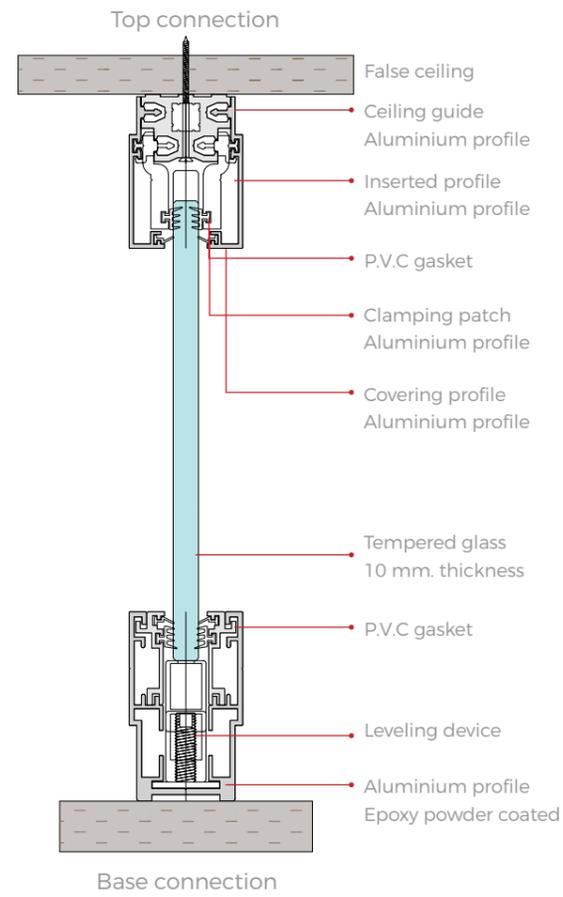

SLIM

Every element of our SLIM partition system offers the utmost in precision and in aesthetical pleasure. SLIM partition system is suitable in indoor open spaces to create closed offices and separate zones. Mounting can be floor anchored and free standing, or floor and ceiling anchored. SLIM is available with glass and wood panels.

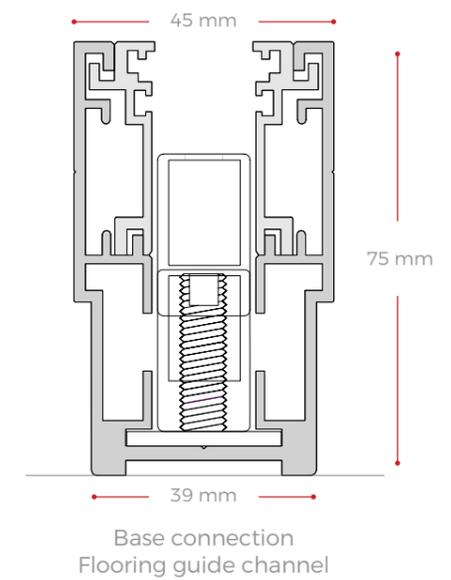

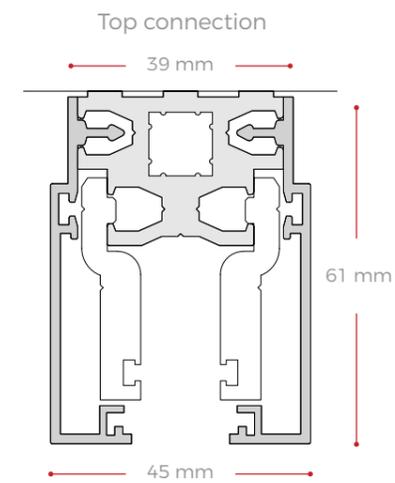

SLIM PARTITION SYSTEM

VERTICAL DETAIL

SLIM overcomes problems with ceiling height and accommodates all widths.

It has been designed with minimal aluminum details and "seamless" flush doors.
